20 HOOKS THAT WORK

Openers that stop the scroll in the first three seconds. Fill in the blanks, film it, post it.

From the reel: "This video already lost you"

The first 3 seconds decide everything

Most reels don't flop because of the algorithm. They lose people before the hook even lands. Three rules before you use any hook in this file:

1 **Open with the result, not a greeting**

Nobody stays for "Hey guys." Your first sentence is the hook. Say it in the first two seconds.

2 **Make frame one move**

A still first frame gets scrolled past. Start mid-action: a cut, a zoom, text popping in, your hand already moving.

3 **Show it, then explain it**

Put the payoff on screen first. The how comes after the viewer has a reason to stay.

How to use this file: pick one hook, swap the highlighted blanks for your own details, and put the hook on screen as text while you say it.
